NOW on demonstration at Oxford Audio (NEW) Theos & ElectroMotion from MartinLogan

Theos is the most affordable hand-built electrostatic speakers with real wood finishes and custom bi-wire capable binding posts.

ElectroMotion ESL represents the most compelling 'affordable' audiophile-grade speakers ever brought to market.

Theos

Features advanced XStat™ electrostatic technology and proprietary Vojtko™ crossover topology delivering the highest sonic standards of efficiency and precision.

Passive 8-inch high excursion woofer and ultra low turbulence down-firing bass port generate unyielding, detailed bass down to 43Hz.

Custom coupling spikes and tool-less bi-wire binding posts provide the final touch - providing the ultimate level of flexibility for connection and setup.

ElectroMotion

Features both electrostatic and compact Folded Motion™ thin film transducer technologies.

Pushes thin film transducer technology to its limit, establishing a new benchmark for price versus performance.

Featuring a full-sized 34-inch tall curvilinear XStat™ electrostatic transducer and precision 8-inch high-excursion, audiophile grade, doped fiber cone woofer for balanced low-end bass performance.

ElectroMotion ESL features the most affordable full-size XStat™ electrostatic transducer ever designed.
